

APPENDIX F

VARIANCE REPORT

INTERNATIONAL
TECHNOLOGY
CORPORATION

Variance No: DECONOCT.VAR

Linked w/NC No:

X

Date of Issue: 10/30/98

Page 1 of 1

Project Name: Fort McClellan - CK05

Project Number: 774645

-Variance Report -

I. Description: (by the person identifying the change)

FORMER DECONTAMINATION COMPLEX, PARCELS 93(7), 46(7), 140(7), AND 70(7)

Unable to collect groundwater samples from direct-push temporary wells FTA-93-GP10, FTA-93-GP11, FTA-93-GP23, and FTA-93-GP24 because the wells were dry (or) groundwater was not present in sufficient volume to effectively purge the groundwater from the wells.

Identified by: Jeffrey Tarr, PG - IT Site Manager

Date: 10-30-98

II. Justification For Variance:

Unable to collect groundwater samples from direct-push temporary wells because the wells were dry (or) groundwater was not present in sufficient volume to effectively purge the groundwater from the wells. Therefore, International Technology will attempt to install temporary wells using hollow-stem augers. Drilling using hollow-stem augers may produce enough groundwater so that wells can be developed and groundwater samples collected.

III. Applicable Document/Work Plan: (by the person identifying the change)

Final Site-Specific Field Sampling Plan, Former Decontamination Complex, October 1998.

Distribution List:

1. Jeanne Yacoub, IT Project Manager
2. Steve Moran, IT Technical Lead
3. Jeffrey Tarr, IT Site Manager
4. Randy McBride, IT QA Officer
5. Mr. Ellis Pope, US Army Corps of Engineers
6. Mr. Ross McCollum, US Army Corps of Engineers
